3.c	How satisfied are you with the process of applying for and obtaining government schemes?	Very satisfied Satisfied Unsatisfied Very unsatisfied Don't Know No Answer	1 2 3 4 998 999	

3.d	Generally, how satisfied are you with the Gram Panchayat?	Very satisfied Satisfied Unsatisfied Very unsatisfied Don't Know No Answer	1 2 3 4 998 999	
-----	---	---	--------------------------------	--

Every respondent in sample will have an equal chance of receiving any one of the following six scenarios.

3.e – 3.g: These questions will be answered in response to the scenario presented.

1. Suppose that the government started a new program last year that should provide cash transfers to poor households. At the end of the year, the government is assessing the success of the program and whether it should continue. 70% of households who should receive the program were found and signed up. A survey of the beneficiaries found that 82% were happy with the program. However, an accounting review found that 15% of the total program funds are unaccounted for.
2. Suppose that the government started a new program last year that should provide cash transfers to poor households. At the end of the year, the government is assessing the success of the program and whether it should continue. 70% of households who should receive the program were found and signed up. A survey of the beneficiaries found that 82% were happy with the program.
3. Suppose that the government started a new program last year that should provide cash transfers to poor households. At the end of the year, the government is assessing the success of the program and whether it should continue. 60% of households who should receive the program were found and signed up. A survey of the beneficiaries found that 82% were happy with the program. However, an accounting review found that 15% of the total program funds are unaccounted for.
4. Suppose that the government started a new program last year that should provide cash transfers to poor households. At the end of the year, the government is assessing the success of the program and whether it should continue. 70% of households who should receive the program were found and signed up. A survey of the beneficiaries found that 82% were happy with the program. However, an accounting review found that 25% of the total program funds are unaccounted for.
5. Suppose that the government started a new program last year that should provide cash transfers to poor households. At the end of the year, the government is assessing the success of the program and whether it should continue. 60% of households who should receive the program were found and signed up. A survey of the beneficiaries found that 82% were happy with the program. However, an accounting review found that 25% of the total program funds are unaccounted for.
6. Suppose that the government started a new program last year that should provide cash transfers to poor households. At the end of the year, the government is assessing the success of the program and whether it should continue. 70% of households who should receive the program were found and signed up. A survey of the beneficiaries found that 82% were happy with the program. However, an accounting review found that 5% of the total program funds are unaccounted for.
